

# KOMFORT SMOOTH FIBERGLASS PATIO DOOR

***White Smooth Fiberglass***

***White Composite Jamb***

***DP-50 Rating***

***Msystem 25 Warranty***

**KOMFORT WITH PERFORMANCE**

**Msystem 25 Warranty**

**10 years on the glass**

**25 years on all other parts**

**Plastpro  
Smooth Fiberglass Slab**

The smooth fiberglass slab and jamb from Plastpro is designed with Hdyroshield Technology.

The door has a water resistant smooth fiberglass skin. Also, it is manufactured with composite stiles and rails on all four sides. This virtually allows for no water penetration, making it not susceptible to rotting, twisting, or warping. And since it contains no metal, rust will also not appear. This leaves you with a high performance door with a long lasting, quality appearance.

The frame is a smooth closed cellular that ensures the door frame;

- ✓ Will not absorb or wick moisture.
- ✓ Prevents warping.
- ✓ Will not rot or split.
- ✓ Is impervious to insects.

The Komfort series door with Hydroshield Technology gives you a long lasting, beautiful patio door.

**Polyurethane Core**

**Engineered Composite Stiles and Rails**

**Wood Reinforcement**

**Fiberglass Reinforced Skins**
